Ratlam, Madhya Pradesh - 457336, India

OBJECTIVE

Seeking a challenging software engineering role to leverage my expertise in MEAN, MERN, C/C++, Node.js, Python, SQL, MySQL, and MongoDB. Aiming to contribute to innovative projects at the intersection of full-stack development, database management, and practical problem-solving in areas like web applications and scalable systems and AI-driven solutions..

EXPERIENCE

• **iFlair Web Technologies Pvt. Ltd. [⊕]**   *Febuary 2024 – Present*

 JavaScript Developer   Ahmedabad, India

 ◦ Built and maintained high-traffic web apps using Angular and Node.js, supporting 50K-70K daily visitors.

 ◦ Optimized databases with MySQL, SQL, and MongoDB, ensuring performance and reliability.

 ◦ Integrated front-end frameworks with back-end services for seamless, efficient applications.

 ◦ Collaborated with teams to deliver scalable, secure web solutions on time.

• **Indvibe Infotech Pvt Ltd [⊕]**   *June 2023 - November 2023*

 React.js intern   Indore, India

 ◦ Built and maintained company website using React.js, enhancing dynamic UIs.

 ◦ Applied Redux for state management, boosting app performance.

 ◦ Worked with senior developers to create responsive designs for better UI/UX.

 ◦ Gained expertise in React tools, including hooks and context API, contributing to project success.

EDUCATION

• **Shri Yogindra Sagar Institute of Technolog and Science (R.G.P.V.)** *2019 -*   *2023*

 *Bachelor of Technology*   Ratlam (M.P.), India

 ◦ Grade: 83.4%

PROJECTS

• **E-Commerce Platform for Clothing Brand:**   *April 2024 - Present*

 Tools: [Angular,Node.js,Socket.IO,SQL,AWS,Vercel]   []

 ◦ Engineered an e-commerce platform for multi-vendor management and product sales.

 ◦ Leveraged Angular and Node.js to build a robust, scalable interface, enhancing product management.

 ◦ Developed a sophisticated T-shirt customization tool, driving user interaction and satisfaction.

 ◦ Utilized SQL and MongoDB for advanced data management and analysis, boosting database efficiency.

• **Job - Portal Web Application:**   *June 2024*

 Tools: [React , Redux , Socket.IO , Python , Boostarp]   []

 ◦ Architected a high-scalability job portal using React.js.

 ◦ Engineered a robust backend with Python Django, ensuring secure job management and streamlined user application processes.

 ◦ Enabled streamlined job registration and application processes, enhancing recruitment efficiency.

 ◦ Integrated real-time notifications, boosting user engagement and expirence.

• **My Portfolio:**   *December 2023*

 Tools: [Angular , NgRx , Tailwind , Animations]   []

 ◦ Explore my portfolio to see a diverse range of projects I've developed and contributed to, showcasing my skills and experience.

 ◦ Visit my portfolio to view detailed case studies and project highlights that demonstrate my expertise in various technologies.

SKILLS

- **Programming Languages:** JavaScript, C, C++, Python
- **Web Technologies:** React, Angular, Next.js , Node.js , Redux, NgRx , Express , FullStack(Mean,Mern)
- **Database Systems:** SQL, MySQL, MongoDB, PostgreSQL, SQLite, NoSQL Databases
- **DevOps & Version Control:** Git, GitLab, Docker, CI/CD Tools
- **Specialized Area:** Web Development, Javascript
- **Other Tools & Technologies:** Chakra UI, Bootstrap, Tailwind, VanillaJS, jQuery, Webpack
- **Research Skills:** Systems Design, Statistical Analysis, AI Research

CERTIFICATIONS

- **Website Design From global Computer Education**   *May 2022 - september 2022*
- C/C++ Programming from ATL Education Foundation   *May 2022 - september 2022*
